

PIPE TESTING & DRYING

TESTING

- Ensures pipe dew point meets specs
- Dew point of $< +20^{\circ}$ is passing
- Increases longevity of pipe and prevents the need for replacement
- Readings taken with witness present
- Written report submitted with results
- Tests up to six pipes at once

DRYING

- Dry up to six pipes at once for 24/hrs
- Time to dry depends on starting dew point, length of pipe, and time running
- Relocation and testing is done as needed throughout the rental
- 110v or generator options available
