

SPOT HEATING AND COOLING

HSP 400ID-G

The HSP400ID-G Indirect Fired (Natural Gas or Propane) Heaters are highly efficient devices that provide large volume of 100% clean, dry and fume free warm air. They are best for places with limited ventilation like shops, event tents, food preparation areas, exhibition halls, and construction sites. They can be used with flexible duct that spreads the warm air around easily.

- **Heavy duty frame**
- **Lift bracket**
- **Powerful fans ensure high static pressure**
- **Long life stainless steel combustion chamber**
- **Electronic flame control**
- **Water resistant flame control box**
- **Automatic safety and control devices**
- **Optional thermostat available**
- **Heat exchanger to keep exhaust gas and heated air separate**
- **UL Certified**

SPOT HEATING AND COOLING

Ideal applications for Heat Star HSP400ID-G

- **Construction Sites**
- **Event Tents**
- **Exhibition Halls**
- **Repair Shops**

HSP 400ID-G Specifications

Weight	473 LBS
Fuel Type	Natural Gas Or Propane
Electrical Rating	120V/60Hz, 13 Amps
Air Volume (CFM)	4032
Gas Inlet Connection	1/2in
Gas Inlet Pressure Min NG	(7in w.c.) / LP (8in w.c.)
Gas Inlet Pressure Max NG	(10in w.c.) / LP (13in w.c.)
Clearance to Combustibles	Horizontal 6 ft
Duct Length	Max100 ft
Duct Diameter	Standard Dual (12in) 12in x 25ft
Thermostat	Analog (33')
Item Length (in)	68
Item Width (in)	27
Item Height (in)	60
Warranty	1 Year Limited
Model	HSP400ID-G
